EDUCATION

St. Thomas' College of Engineering and Technology

Bachelor of Technology in Electronics and Communication Engineering — 2021 - 2026 | CGPA: 7.04

Future Campus School

All India Senior School Certificate Examination (Class 12) — 2020 - 2021 | Percentage: 67.5%

St. Stephen's School

All India Secondary School Examination (Class 10) — 2018 - 2019 | Percentage: 72%

TECHNICAL SKILLS

Frontend Technologies: React.JS, React Native, HTML5, CSS3, JavaScript (ES6+), Responsive Design

UI/UX Tools: Figma to Code, Cross-browser Compatibility, Performance Optimization

Backend & APIs: Node.JS, Express.JS, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

Development Tools: Git, GitHub, Vercel, Async Storage

EXPERIENCE

Pitchmatter

Developer (In Progress) | March 2026

- Applied programming knowledge to develop web applications
 - Worked with databases and SQL queries for data management
 - Debugged and resolved software issues through systematic problem-solving
 - Collaborated with team members and communicated technical concepts effectively
-

PROJECTS

Todo App

Technologies: Programming with JavaScript, Database (MongoDB), Application Development

Live: <https://todo-app-psi-mauve.vercel.app/> | GitHub: github.com/sourasish423/ToDo-App

- Developed task management application demonstrating understanding of application development
- Implemented database modeling with MongoDB for storing user tasks and data
- Applied problem-solving skills to debug and test software functionality
- Deployed application demonstrating familiarity with software deployment processes

Movie App

Technologies: Programming with JavaScript, SQL/Database concepts, Application Development

Live: react-movie-app-pied-pi.vercel.app | GitHub: github.com/sourasish423/react-movie-app

- Built movie browsing application using basic programming knowledge
- Worked with databases to store and retrieve user favorites data
- Applied debugging skills to identify and resolve software issues

- Tested application functionality to ensure proper software operation
