Concepts: OOP, Data Structures

PROJECTS

Movie App | React | TMDB API | REST | Async Storage

Live: <https://react-movie-app-pied-pi.vercel.app/> | **GitHub:** github.com/sourasish423/react-movie-app

- Integrated TMDB REST API with pagination support (500+ pages) and optimized asynchronous data fetching.
- Implemented multi-screen navigation with dynamic routing and detailed movie view architecture. ☐ Built persistent “Favorites” feature using Async Storage to maintain user data across sessions.

To-Do List Application | React | JavaScript | Local Storage

Live: <https://todo-app-or6y.vercel.app/> | **GitHub:** <https://github.com/sourasish423/ToDo-App>

- Developed a task management application implementing full CRUD operations (create, update, delete).
 - Implemented task completion feature with dynamic UI updates (line-through/tick indicator).
 - Managed application state using React Hooks for real-time rendering.
 - Integrated Local Storage to persist tasks across browser sessions.
-

Education

B.Tech in Electronics & Communication Engineering (ECE)

St. Thomas' College of Engineering & Technology, Kolkata

MAKAUT | 2026 (Expected) | CGPA: 7.01

Class XII (CBSE)

Future Campus School, Kolkata

2021 | 65.08%

Class X (ICSE)

St. Stephen's School, Kolkata 2019

| 72.08%

Bharat Sanchar Nigam Limited (BSNL) – Intern (2024 | Location-Kalyani)

- Observed telecom network operations and infrastructure management.
- Gained exposure to routing, switching, and broadband service systems.
- Assisted technical team in basic troubleshooting and documentation.
